Church: Towards a Common Vision was received by the central committee in 2012 and sent to the churches to encourage further reflection on the Church and to seek their formal responses to the text. This study and its response process will have an important role in the coming years for discerning the next steps toward visible unity.

THE CHURCH TOWARDS A COMMON VISION

Undersampling is a first idea towards countering class imbalance. Image under CC BY 4.0 from the Deep Learning Lecture.. One thing that you can do is for example resampling. The idea is that you balance the class frequencies by sampling classes differently, So, you can understand this means that you have to throw away a lot of the training data of the most frequent classes.

Common Practices — Part 3. Class Imbalance | by Andreas ...

This is because sigmoid gives us values in the range $[0, 1]$ which can help us to train a network for binary encoded output. This shall be done along with a binary cross entropy loss function. ReLU (Rectified Linear Unit) Function. ReLU is simply outputting the non-negative output of a neurone. Mathematically, this can be represented as shown in ...
