Most beginners think the magic of photography happens in the camera body, but the true source of magic is light. A well-lit subject can be captured poorly, but a poorly-lit subject will never look good. Therefore, you must understand the exposure triangle. Exposure is the most important out of all basic photography tips.

Your ISO setting determines how sensitive your camera's sensor (the part inside your camera that captures an image) is to light. The lower your ISO setting, the less sensitive. The higher the setting, the more sensitive. The higher you set your ISO, the more light your camera will be able to "gather".
