Cadence® PCB design solutions enable shorter, more predictable design cycles with greater integration of component design and system-level simulation for a constraint-driven flow. Design Authoring PCB Layout

PCB Design and Analysis - Cadence Design Systems

The Cadence ® Allegro ® PCB Designer quickly takes simple and complex designs from concept to production in a constraint-driven design system to ensure functionality and manufacturability. Scalable technology allows designers to cost-effectively match all current and future technological and methodological needs for teams, organizations, and projects of all sizes and complexities.

Allegro PCB Designer - Cadence Design Systems

Cadence PCB: Back-End Board Layout and Routing. Once upon a time, PCB designers were draftsman. The measure of their craft was twofold—quality of lines and speed of completion. But designs have changed, and so have designers. They've adapted to increasingly complex designs. And their tools have evolved, too.

Cadence PCB: Back-End Board Layout and Routing

Professional PCB Design, Board Layout & Routing The Allegro engine powers OrCAD and your productivity. PCB layout and high-speed routing are no match for your skills, and a little real-time electronic design feedback from the tool. With OrCAD, you can produce a manufacturable board design faster.
