Medical detoxification, or medical detox, is an essential first step in recovery from drug or alcohol addiction. Since alcohol withdrawal is life-threatening when severe, medical alcohol detox is an absolute necessity. Medical drug detox is indicated for all individuals who have shown signs of physical and psychological dependence on a substance.

44 Alcohol Health & Research World. Alcohol detoxification can be defined as a period of medical treatment, usually including counseling, during which a person is helped to overcome physical and psychological dependence on alcohol (Chang and Kosten 1997). The immediate objectives of alcohol detoxification are to help the patient achieve a substance-free state, relieve the immediate symptoms of withdrawal, and treat any comorbid medical or psychiatric conditions.
