The electromagnetic wave equation is a second-order partial differential equation that describes the propagation of electromagnetic waves through a medium or in a vacuum.It is a three-dimensional form of the wave equation.The homogeneous form of the equation, written in terms of either the electric field **E** or the magnetic field **B**, takes the form: $(\nabla^2 - \partial^2/\partial t^2) = (\nabla^2 - \partial^2/\partial t^2) = \dots$
