### **Project Orion The True Story**

Conceived in the wake of Sputnik, Project Orion was a true vision of '50s engineering: a huge 40-person ship powered by hundreds of tiny atomic bombs, capable of much greater lift and efficiency than chemically driven rockets. Struggles between NASA, the military, Congress, and other parties doomed Orion, but Dyson has gathered hundreds of documents and interviewed most of the researchers and engineers who worked together, trying to reach "Saturn by 1970."

Project Orion was a study of a spacecraft intended to be directly propelled by a series of explosions of atomic bombs behind the craft. Early versions of this vehicle were proposed to take off from the ground; later versions were presented for use only in space. Six non-nuclear tests were conducted using models. The project was eventually abandoned for multiple reasons such as the Partial Test Ban Treaty which banned nuclear explosions in space as well as concerns over nuclear fallout. The idea
