Relationships And Biodiversity Lab 1 Answer Key

This lab has 7 tests used to determine the relatedness of 4 plant samples. Remember that scientists use a variety of evidence to determine evolutionary relationships, including cell types, structural morphology, DNA, behavior, embryology, and fossils. The more criteria that are shared between organisms, the more likely they are closely related.

Review Sheet - New York Science Teacher

What does this lab entail? •Seven tests that look at the physical, chemical, and microscopic characteristics of three plants that may be able to create Curol, even though they are not Botana curus (the plants that does produce it). •Comparison of data to determine relationships. •Define the crucial need for biodiversity.
