This includes public domain books and promotional books that legal copyright holders wanted to give away for free.

**Violin Bridge Template**  
Normally, you buy a bridge blank 41.5 mm wide for the 4/4 violin and carve it to get the best sound. See Fig. 1 for a typical bridge blank. The position of the bridge is marked by the inner nicks in the f-holes. The back of the bridge should be at right angles to the top plate, the feet of the bridge should be in perfect contact with the arching.

**Bridge Fitting Tools - internationalviolin.com**  
Violin bridge fitting involves a certain amount of refining and shaping as well as knowing where to place the bridge. Every bridge starts out as a 'blank', a crude, thick, unshaped design. Bridge blanks come in different sizes. A standard full-size bridge is 41.5 millimetres wide, but a narrow violin will require a smaller bridge.

projections. Eventually, you will want to have a sample template for each nominal size of all the instruments in the violin family. The sample bridge template will allow you to predict with relative accuracy the compensations that must be made when cutting the bridge blank so that you can adjust for any irregularities unique to the

**FITTING A FINE BRIDGE TO A PROFESSIONAL QUALITY INSTRUMENT ...**  
Howdy, I found a decent 3/4 violin that I fixed up for my son. Normally runs around 400 dollars new, I got it for 20 bucks (just had to go in and fix a crack in the top; stable now). At any rate, I bought a bridge blank, but have not been able to come across a decent (free) bridge template. Any recommendations out there? I know he would get the best setup by a professional, but I want to try ...

**Violin Bridge Templates - Mandolin Cafe Forum**  
I have a book (which I put much trust in) which gives the radius of the bridge curve as 41mm and the height of the G/E strings above the end of the fingerboard as 5/2.5 mm respectively for a 4/4 violin. It's fairly easy to draw a template for a bridge of this type and transfer it to a bit of cardboard or thin plastic or whatever takes your fancy!

**4 string Fiddle Bridge curve pattern**  
Violin bridge blank & fitted bridge Violin bridges should be individually tailored. Bridges come from the supplier partially finished and it is a common misconception that a bridge "blank" can be installed directly on an instrument without modification.

**Violin Bridges - 6 things to look for - Beau VincI Violins**  
Left unchecked, this will create extreme stress on the waist (middle) of the bridge and may eventually cause the bridge to warp or even break, requiring the costly bridge replacement. In the process of tuning the violin up to pitch, the bridge must be frequently examined and adjusted for its proper angle. David Gusset. The Strad, December 2014
