The best part is that FeedBooks is a fast website and easy to navigate.

## Yamaha Outboard Engine Problems

Consumers who experienced problems with certain outboard motors manufactured by Yamaha may have legal recourse to collect compensation for the cost of repairs and other damages. It has been alleged that the company's first-generation F-Series four-stroke outboard motors (model years 2000 - 2005) contain a serious defect that allows the exhaust passages to corrode and pit severely, ultimately resulting in premature engine problems and failure.

Recently, the BoatUS Consumer Protection Bureau has been made aware of dozens of reports regarding serious corrosion problems in Yamaha outboards, specifically 2000 to 2004, first-generation F225 models. Over time — the issue usually surfaces after 500 to 700 hours of use — the engine's exhaust gases appear to corrode the exhaust tube and sometimes the engine's oil pan, which is in the same area.

Troubleshooting Outboard Fuel Pump Problems When people talk about the fuel pump on an outboard, they're referring to the low pressure fuel pump mounted on the side of the motor. The fuel pump has one job, and that's to pump fuel from the fuel tank to the motor. If the fuel pump isn't working properly, the engine won't either.
